

conTgo Appoints Two New Executives; Accelerating Demand For MTA Mobility Platform For Travel

June 24, 2011

With more companies and service providers relying on conTgo, especially during major travel disruptions caused by ash, strikes or natural disasters, technology start-up conTgo today announced the appointment of two senior executives to further manage client growth and accelerating demand around the world. Tony Mikkelsen is the new Vice President, Sales and Business Development, and Tod Lockard is the new Vice President, Customer Value & Chief Marketing Officer. Each reports to conTgo's CEO Johnny Thorsen, and are members of the company's global leadership team.

Mikkelsen, joining directly from Sabre, is a Danish/American citizen and brings more than 20 years of international sales and business development experience from blue-chip IT companies EMC, TERMA and CRI. He holds a Bachelor degree in Mechanical Engineering from the Danish Technical University and a Master of Business Administration degree from City University.

Lockard brings over 20 years of international experience leading fast-growth technology and service offerings for start-ups and blue-chip companies in the travel, technology, and financial services industries. He has held senior management positions with American Express, HSBC, Carlson Wagonlit, Sabre and HP-EDS. He was part of the core team that internationalised GetThere before and after its sale to Sabre for over \$750 million.

conTgo CEO, Johnny Thorsen said, "I am thrilled that conTgo technology is becoming a mission critical component for companies and their travel management service providers, and that we can attract two proven experienced global leaders that will help support our customers needs and take conTgo to the next stage of its growth potential".

About conTgo;

conTgo operates a global platform for intelligent service delivery in the travel industry. The platform, known as MTA (Mobile Travel Assistant), is used by global corporations, TMC's (Business travel agencies) and suppliers to connect and service the traveller via any mobile phone before, during and after the trip. The MTA platform provides existing customers such as Microsoft, American Express, Lego, Orange and QBT with access to a wide range of proprietary and third-party services designed to improve the life of the individual traveller, while ensuring corporate duty of care requirements are met which is a step-change improvement of the overall value of the travel procurement program compared to how it used to be managed.

The MTA platform also includes access to conTgo's MapCast, the worlds first map-based 2-way communication engine with geo-spatial traveller search and instant messaging alerts and broadcasts to travellers. MapCast is used to manage large-scale disruption events in the travel industry such as the recent volcanic ash clouds or the earthquake and tsunami events in Japan and New Zealand.

conTgo has been operating and enhancing the MTA platform since April 2007, and processed more than 1 million travel bookings in 2010. The company is headquartered in London, UK, and has customers in more than 90 countries with more than 500,000 unique corporate travellers who have experienced the MTA platform services.
